ENGINEERING YOUR SUCCESS.

WARNING – USER RESPONSIBILITY

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

- This document and other information from Parker-Hannifin Corporation, its subsidiaries and authorized distributors provide product or system options for further investigation by users having technical expertise.
- The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.
- To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.

Parker Hannifin

The global leader in motion and control technologies

Global Product Design

Parker Hannifin has more than 40 years experience in the design and manufacturing of drives, controls, motors and mechanical products. With dedicated global product development teams, Parker draws on industry-leading technological leadership and experience from engineering teams in Europe, North America and Asia.

Local Application Expertise

Parker has local engineering resources committed to adapting and applying our current products and technologies to best fit our customers' needs.

Manufacturing to Meet Our Customers' Needs

Parker is committed to meeting the increasing service demands that our customers require to succeed in the global industrial market. Parker's manufacturing teams seek continuous improvement through the implementation of lean manufacturing methods throughout the process. We measure ourselves on meeting our customers' expectations of quality and delivery, not just our own. In order to meet these expectations, Parker operates and continues to invest in our manufacturing facilities in Europe, North America and Asia.

Electromechanical Worldwide Manufacturing Locations

Europe

Littlehampton, United Kingdom
Dijon, France
Offenburg, Germany
Filderstadt, Germany
Milan, Italy

Asia

Wuxi, China
Jangan, Korea
Chennai, India

North America

Rohnert Park, California
Irwin, Pennsylvania
Charlotte, North Carolina
New Ulm, Minnesota

Local Manufacturing and Support in Europe

Parker provides sales assistance and local technical support through a network of dedicated sales teams and authorized technical distributors throughout Europe.

For contact information, please refer to the Sales Offices on the back cover of this document or visit www.parker.com

Offenburg, Germany

Milan, Italy

Littlehampton, UK

Filderstadt, Germany

Dijon, France

Electric Tubular Motor - ETT

Overview

Description

ETT is a direct thrust linear motor actuator, ideally suited to all kinds of linear handling and pick & place applications. It is a cost-effective and energy-efficient alternative to pneumatic cylinders in applications that demand greater flexibility and control.

The ETT's linear motion is directly generated without the need for mechanical transmission elements like ball screws, toothed belts and gearboxes. The tubular motor has two main components; the rod (shaft) and the stator with integrated feedback (body). The shaft is made of a stainless steel tube with built in neodymium magnets, which thanks to their high performance, are able to deliver impressive thrust values up to 2083 N. The main body comprises the stator winding, the feedback electronics and high performance bearings. A major benefit of the ETT design is that long and/or heavy duty cycles are possible without the need for additional cooling. The IP67 protection class allows the ETT tubular motor to be used in harsh environmental conditions.

Features

- Ultra dynamic linear motion and position control capabilities
- Ideally suited for pneumatic substitution where greater position control capabilities are required
- Four lengths and four sizes meeting the requirements of the pneumatic ISO flange standard (DIN ISO 15552:2005-12) for simplified mechanical integration
- Swivelling electrical connectors and extensive accessory options allow flexible mounting
- Reduced mechanical complexity delivers high energy efficiency and reduces maintenance
- AISI304 stainless steel shaft allows it's use in "clean" environments
- High thermal efficiency improves reliability and increases mechanical life
- Wide choice of rod end mounting options, including swivel rod eye, increases flexibility

Target markets

- Food, Pharmaceutical & Beverage
- Packaging Machines
- Material Handling
- Factory Automation

Technical Characteristics - Overview

Motor type	Linear tubular servo motor
Rod	AISI304 (stainless steel)
Rated force	8...295 N
Peak force	56...2083 N
Speed range	up to 8 m/s
Acceleration range	up to 350 m/s ²
Mounting	Screw fixed
Shaft end	Front male thread, Rear cap end Other options available
Cooling	Natural ventilation
Protection level (IEC60034-5)	IP67
Feedback sensor	Analog Hall 1Vpp (SinCos 90°) Other feedback on request
Thermal protection	KTY PTC or PT1000 as option
Marking	CE
Voltage supply	230 VAC (all sizes) 400 VAC (only ETT80)
Temperature class	Class F
Connections	Connectors Flying leads as option
Bi-directional accuracy	0.5 mm

All alignment coupler sizes are sized on continuous force of ETT. For other force options, please contact Parker

Sealing Rings

ETT motors can be equipped with sealing rings for protecting the coil from contaminants, spray water or excessive grease loss; thus increasing the motor service life.

Sealing rings of special design	
Material	Thermoplastic polyurethane elastomer
Colour	Green
Temperature range	From - 30 °C to + 100 °C
Hardness	47 ± Shore D
Ageing resistance	
Light	Very good
Ozone	Good
Media resistance	
Mineral oils, greases	Yes*
Highly blended/synthetic lubricants	No*
Aggressive	No*

Adding sealing rings will change some ETT requirements:

- rod must be lubricated with grease type RHEOSIL 500F
- speed is limited up to 3 m/s max
- temperature range changes to -30 °C... + 100 °C
- stroke of the rod decreases
- rotating movements are not allowed
- rod needs to be kept clean

*Please contact your nearest sales office

ETT with Slide Guide System

As the system is based on polymer plain bearings, the motor shaft can only sustain limited radial loads; the slide guide system of the ETT motor makes it the ideal solution for applications requiring an anti-rotational device and where lateral force occurs.

Two different configuration layouts are available:

ETT with Slide Guide System

Coil movement for long stroke and heavy load

Both solutions use an external system of block bearing, rail and rod-end designed for a specific application. An external linear feedback can be added on the mechanical system to improve the precision and repeatability of the system. With coil movement it's recommended to remove the bush bearing, it's mandatory for long strokes.

Structure of the Slide Guide System

RAIL	
Series	ETT-LR Rail option
Rail type	1 Type NB
	025 n.a.
	032 Designed for motor size 032 - 9 mm size
ETT motor size	050 Designed for motor size 050 - 15 mm size
	080 Designed for motor size 080 - 20 mm size
Length	xxx *See table of rod length

SLIDE GUIDE	
Series	ETT-LC Slide guide option
Rail type	1 Type NB
	025 n.a.
	032 Designed for motor size 032 - 9 mm size
ETT motor size	050 Designed for motor size 050 - 15 mm size
	080 Designed for motor size 080 - 20 mm size

FLANGE	
Series	ETT-LF Flange option
Side of flange	F Front flange
	R Rear flange
	025 n.a.
	032 Designed for motor size 032 - 9 mm size
ETT motor size	050 Designed for motor size 050 - 15 mm size
	080 Designed for motor size 080 - 20 mm size

SUPPORT FOR SLIDE GUIDE	
Series	ETT-LA Metal support for slide guide option
	025 n.a.
	032 Designed for motor size 032 - 9 mm size
ETT motor size	050 Designed for motor size 050 - 15 mm size
	080 t.b.d.
	S1 Winding: Serial, Stack Length 1 - not available for size 080
	S2 Winding: Serial, Stack Length 2
	S3 Winding: Serial, Stack Length 3
	S4 Winding: Serial, Stack Length 4 - only size 080
	S5 Winding: Serial, Stack Length 5 - only size 080
Length	

The solution can be ordered as a complete system mounted and tested. The slide guide system structure results in a reduction of ETT performance due to additional moving mass and friction. ETT with slide guide system is an ideal solution for easy integration into pick and place gantries and general purpose material handling machines.

Feedback

Internal position sensor-analogue sin/cos

The position sensor outputs analogue, differential sine and cosine signals for providing position feedback. Shown below in the follow table the main features of sin/cos feedback.

	ETT025	ETT032	ETT050	ETT080
Pole pitch [mm]	60	60	60	60
Output current [mA]	50	50	50	50
Supply voltage [VDC]	5 ± 0.25			
Supply current [mA]	40 ± 10%			
Repeatability up to [µm]	± 50			

Internal position sensor-incremental TTL

The incremental position sensor outputs have TTL line drives signals, A and B, /A and /B without track of zero. The resolution is programmable and the default value is 2048 increments.

	ETT025	ETT032	ETT050	ETT080
Pole pitch [mm]	60	60	60	60
Output signals	A, B, /A, /B			
Supply voltage [VDC]	5 ± 0.25			
Supply current [mA]	100 ± 10%			
Repeatability up to [µm]	± 50			
Resolution with 2048 increments [µm]	29.3			
System accuracy [mm]	± 0.5			
Error of linearity	< 1%			
Max resolution	24 bit			

Internal position sensor-BISS-C

The internal feedback allows to have a BISS-C interface option. The electronic board contains an integrated sensor, interpolation electronics and motor parameters as electronic data sheet (EDS).

	ETT025	ETT032	ETT050	ETT080
Pole pitch [mm]	60	60	60	60
Output signals	BISS-C RS485 serial			
Supply voltage [VDC]	5 ± 0.25			
Supply current [mA]	100 ± 10%			
Repeatability up to [µm]	± 50			
Resolution with 2048 increments [µm]	29.3			
System accuracy [mm]	± 0.5			
Error of linearity	< 1%			
Max resolution	8192 increments			

External Linear Encoders

To achieve highest accuracy, the most popular feedback device for linear motor positioning systems is the linear encoder. There are two variants of linear encoders available; magnetic and optical.

MSK500010KE1	<p>Incremental, digital interface, resolution 1 µm</p> <ul style="list-style-type: none"> • Magnetic encoder • Max. resolution up to 1 µm • Repeat accuracy ±0.01 mm • Status LED display • Works with magnetic band MB500 • Reading distance up to 2 m
LIC 2117	<p>Absolute, EnDat interface, resolution 0.1 µm</p> <ul style="list-style-type: none"> • Optical encoder • Max. resolution up to 0.1 µm • Repeat accuracy ±15 µm • EnDat2.2 • Reading distance up to 3 m

Cables and connectors

All cable kits are optimally configured for our servo products line. The characteristics of the cables include: low adhesion, halogen free and flame-retardant according to the requirements DIN VDE 0472. Resistant to oil, grease, coolant and lubricants.

Motor connection power cable

Type	ETT-CAP
Cable design	
Conductor material	Stranded copper
Core structure	(3 + T) x 1.5 mm ²
Core insulation	TEO-Flexene®
Outer sheath	Polyurethane
Colour sheath	Orange RAL2003
Technical data	
Rated voltage	Power: 600/1000 V
Dielectric strength	Power: 4000 V
Insulation resistance	Power: > 2500 MOhm x km
Minimum bending radius	7.5 x diam. unsupported chain 10 x diam. long travel
Max. speed	240 m/min.
Max. acceleration	20 m/sec ²
Cycles	10000000
Operating temperature	-30 + 80 °C
Outer diameter	8.5 mm

Motor connection signal cable

Type	ETT-CAS
Cable design	
Conductor material	Stranded copper
Core structure	[3x(2x0.14 SK)+2x(0.50 SK)] SK
Core insulation	TPE-E
Outer sheath	Polyurethane
Colour sheath	Green RAL6018
Technical data	
Rated voltage	30 V
Dielectric strength	1500 V
Insulation resistance	> 10 MOhm x km
Minimum bending radius	90 mm
Max. speed	240 m/min.
Max. acceleration	20 m/sec ²
Cycles	≥ 5000000
Operating temperature	-30 + 80 °C
Outer diameter	8.4 mm

Application Examples

Stacking

The ETT manages the stacking of CD's after the printing section. Thanks to the complete and ready to use direct drive solution, no more time is spent in assembling and aligning different elements (gearbox, belts and pulley, motor, etc).

Sorting

A supervision system manages the boxes and moves them onto different conveyors following their layout. Both ETT tubular motors are synchronised and can quickly adapt to the box's dimensions. The quick positioning is the main advantage for system performance.

Cutting

Here the ETT function is to cut the material all to the same length. The ETT high force level and synchronization with the conveyor are key benefits in this application. The level of control offered by the ETT means that it is easy to change the format of the material.

Re-positioning

ETT is used to accurately reposition products on conveyors. The flexible dynamic positioning offered by the electric tubular motor guarantees the perfect alignment for different product formats whilst fewer components improves energy efficiency.

Step by Step Selection Process

The following sizing steps help to choose the most suitable electric tubular motor.

1. Select an ETT using estimated application data.
2. Calculate the actually required application data following the dimensioning steps described below.
3. If your application's requirements exceed a maximum value, please choose a larger electro cylinder and recheck the maximum values. Perhaps, a smaller tubular motor can also meet the requirements.

Step	Application data	Selection
1	Accuracy, ambient conditions	Check the basic conditions for the use of the ETT in your application.
2	Required space	Check the space available in your application and choose the motor mounting option: rod movement or coil movement
3	Select stroke	Selection of the desired stroke: Determine required stroke from usable stroke and safety travels select the desired stroke from the list of standard strokes or, if the desired stroke is not listed: Define the length of the usable stroke in steps of one mm. Caution! Please respect the minimum and the maximum possible stroke
4	Maximum force required	Determination of the maximum required axial force (traction and thrust force). With evaluation of duty cycle
5	Select position mounting	Check if the ETT orientation is vertical or horizontal
6	Maximum speed	Selection of the maximum speed required for the application
7	Application cycle	Please check the application cycle
8	Permissible thrust force taking the buckling risk into consideration	Check the maximum thrust force depending on the stroke and the mounting variant. Maybe your application can also be realized with a different mounting variant allowing to attain the maximum thrust force
10	Permissible side load	Determine the lateral forces of your application and compare them to the permissible lateral forces (depending on the stroke)
11	Mounting type	Selection of ETT mounting accessories
12	Rod connection	Selection of the rod mounting type

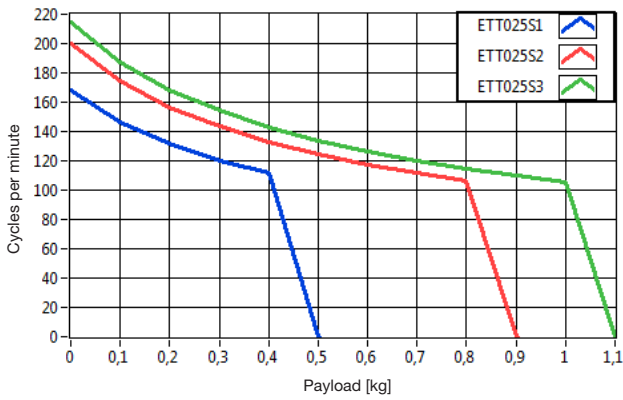

Automated sizing can be done with the help of "ETTsizing" software tool to simplify the process:
www.ettsizing.eu

ETT Range Sizing

In order to simplify the representation, we assumed boundary conditions which must be adhered to without exception in your application, otherwise the product combinations suggested here might not work. In this case, the application must be dimensioned conventionally.

The following graphs show the combination of the maximum cycles per minute and maximum payload for each size of motor with the assumption of: Stroke 90 mm, Triangular profile, Cycle S3 – 5%, Without thrust force.

ETT025

ETT032

ETT050

ETT080

Common Motion Profile Formulas

Triangular Profile 1/2, 1/2

Accelerate to speed and decelerate back to original speed or zero, rest and repeat the process as needed.

This is very simple and is common in applications such as Pick & Place.

Trapezoidal Profile

Accelerate to constant speed, travel at a constant speed and then decelerate back to original speed or zero. This is common in applications such as scanning inspection. There are two types, the 1/3 Trapezoidal Profile and the Variable Trapezoidal Profile.

Item	Symbol	Unit
Stroke	X	mm
Velocity	V	m/s
Acceleration time	T _a	s
Continuous time	T _b	s
Deceleration time	T _c	s
Settling time	T _s	s
Waiting time	T _w	s

Solve for	Have	X (m) T (sec)	V (m/sec) T (sec)	A (m/sec ²) T (sec)	A (m/sec ²) V (m/sec)
Distance X(m)			$X = (1/2) * V * T$	$X = (1/4) * A * T^2$	$X = (V^2/A)$
Velocity V (m/sec)		$V = 2 * (X/T)$		$V = (A * T)/2$	$V = \sqrt{(A * X)}$
Acceleration A (m/sec ²)		$A = 4 * (X/T^2)$	$A = 2 * (V/T)$		$A = V^2/X$

Solve for	Have	X (m) T (sec)	V (m/sec) T (sec)	A (m/sec ²) T (sec)	A (m/sec ²) V (m/sec)
Distance X(m)			$X = (2/3) * V * T$	$X = (1/4.5) * A * T^2$	$X = 2 * (V^2/A)$
Velocity V (m/sec)		$V = 1.5 * (X/T)$		$V = (A * T)/3$	$V = \sqrt{(A * X)/2}$
Acceleration A (m/sec ²)		$A = 4.5 * (X/T^2)$	$A = 3 * (V/T)$		$A = 2 * (V^2/X)$

Solve for	Have	X (m) T (sec)	V (m/sec) T (sec)	A (m/sec ²) T (sec)	A (m/sec ²) V (m/sec)
Distance X(m)			$X = V * T/2$	$X = (A * T^2)/2$	$X = V^2/(2 * A)$
Velocity V (m/sec)		$V = (2 * X)/T$		$V = A * T$	$V = \sqrt{(2 * A * X)}$
Acceleration A (m/sec ²)		$A = (2 * X)/T^2$	$A = V/T$		$A = V^2/(2 * X)$

Peak force $F_{peak} = \max (F_a, F_b, F_c, F_d)$

$$RMS \text{ Force } F_{RMS} = \sqrt{\frac{F_a^2 * T_a + F_b^2 * T_b + F_c^2 * T_c + F_d^2 * T_d}{T_a + T_b + T_c + T_d}}$$

Force Formula

Dynamic force $F_{DYN} = m * a$

Friction force $F_R = \mu * F_N$

Normal force $F_N = \cos \alpha * F_G$

Gravity force $F_G = m * g$

Item	Symbol	Unit
Gravity	g	9.81 m/s ²

Waiting time	T _d	s

Servo Drives Products

Compact Servo Drive SLVD-N

SLVD-N is the family of compact digital servo drives for brushless motors. In addition to positioning applications with trapezoidal profile, electrical shaft, electronic cam, spindle orientation, simulator of stepper motor and torque control, it holds a PLC inside able to talk to the most common industrial programming systems, giving a great freedom of use of the inputs and outputs. It also allows the development of additional configurations to the basis features of the drive, such as gains adjustment of the loop in relation to speed or space, torque monitoring used for tools etc.

Model	Continuous current [A]	Peak current [A]	Size
SLVD1N	1.25	2.5	1
SLVD2N	2.5	5	
SLVD5N	5	10	
SLVD7N	7	14	
SLVD10N	10	20	2

Intelligent Servo Drive Compax 3

Compax3 is Parker Hannifin's global servo drive. The drive series includes single and multi axis drives as well as hydraulic controllers. It features a power range from 1 to 109 kVA.

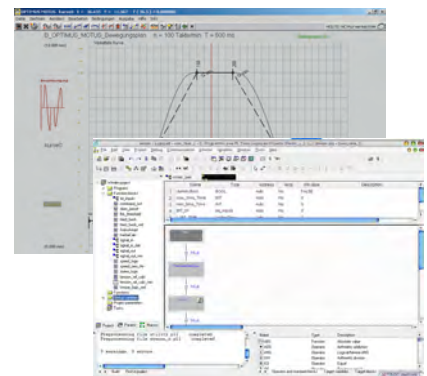

The servo drives are developed and manufactured in Germany. As a global servo drive controller, Compax3 is available all over the world. Service and support sites are located in the vicinity of all major industry locations - worldwide. The "Parker Authorized Distribution Partners" play an important role in this context - well-trained and experienced application and support specialists will provide professional support in any situation.

Device	Current [A]		Supply Voltage	Power [kVA]
	I _{cont.}	I _{peak} (<5 s)		
Compax3				
S025V2	2.5	5.5	1 * 230/240 VAC	1,0
S063V2	6.3	12.6		2,5
S100V2	10	20	3 * 230/240 VAC	4,0
S150V2	15	30		6,0
S015V4	1.5	4.5	3 * 400/480 VAC	1.25
S038V4	3.8	9.0		3.1
S075V4	7.5	15		6.2

Software and Tools

MotionWiz and C3 Servo Manager configuration software are available to configure the SLVD-N and Compax3 system with just a few clicks. The software features an easy and "friendly" interface to speed up installation, optimisation and diagnostics procedures. To simplify configuration, the software shows a typical Windows® environment on the monitor with dialogue windows and toolbars.

ETT Electric Tubular Motor (Complete Unit)

	1	2	3	4	5	6	7	8	9
Order example	ETT	032	S1	CS	M	N	...	C	

1 Type

ETT Electric Tubular Motor

2 Size

- 025** ISO 6432 - Bore 25 mm
- 032** ISO 6432 - Bore 32 mm
- 050** ISO 6432 - Bore 50 mm
- 080** ISO 6432 - Bore 80 mm

3 Winding

- S1** Serial, Stack Length 1
- S2** Serial, Stack Length 2
- S3** Serial, Stack Length 3
- S4** Serial, Stack Length 4
- S5** Serial, Stack Length 5

4 Connection and Feedback Type

- CS** Intercontec Connector (Springtec EEDA101NN00000002000) - Feedback Analogue SinCos 1 Vpp -
- CI** Intercontec Connector (Springtec EEDA101NN00000002000) - Feedback Incremental TTL
- CB** Intercontec Connector (Springtec EEDA101NN00000002000) - Feedback BISS-C
- 1S** Flying leads, Length 1 m, rear output - Feedback Analogue SinCos 1 Vpp - Only ETT025
- 2S** Flying leads, Length 2.5 m, rear output - Feedback Analogue SinCos 1 Vpp - Only ETT025
- 5S** Flying leads, Length 5 m, rear output - Feedback Analogue SinCos 1 Vpp - Only ETT025

5 Rod End Mounting - Front / Rear

- M** Male Thread / Cap End (M5 ETT025, M6 ETT032, M8 ETT050, M10 ETT080)
- F** Female Thread / Cap End (M5 ETT025, M6 ETT032, M8 ETT050, M10 ETT080)
- N** Male Thread / Male Thread (M5 ETT025, M6 ETT032, M8 ETT050, M10 ETT080)
- G** Female Thread / Female Thread (M5 ETT025, M6 ETT032, M8 ETT050, M10 ETT080)
- X** Special (Customized version - Please contact Parker)

6 Fixed Field

N Fixed field

7 Stroke

- Stroke length is in mm, four digits.
- Example 30cm=0300. See table pages
- 12,13,14,15 - column "Stroke".

8 Protection Class

C IP67

9 Customized Options

Blank for standard motors

ETT Electric Tubular Motor (Rod only)

	1	2	3	4	5
Order example	ETT-R	032	M	

1	Type	ETT-R Electric Tubular Motor - Rod only
2	Size	<p>025 ISO 6432 - size 25</p> <p>032 ISO 6432 - size 32</p> <p>050 ISO 6432 - size 50</p> <p>080 ISO 6432 - size 80</p>
3	Rod End Mounting - Front / Rear	<p>M Male Thread / Cap End (M5 ETT025, M6 ETT032, M8 ETT050, M10 ETT080)</p> <p>F Female Thread / Cap End (M5 ETT025, M6 ETT032, M8 ETT050, M10 ETT080)</p> <p>N Male Thread / Male Thread (M5 ETT025, M6 ETT032, M8 ETT050, M10 ETT080)</p> <p>G Female Thread / Female Thread (M5 ETT025, M6 ETT032, M8 ETT050, M10 ETT080)</p> <p>X Special (Customized version - Please contact Parker)</p>
4	Length	<p>..... Rod length is in mm, four digits.</p> <p>..... See tables pages 12,13,14,15 - column</p> <p>..... "Part Number Codification"</p>
5	Customized Options	Blank for standard motors

Order Code

ETT Electric Tubular Motor (Coil only)

	1	2	3	4	5	6	7
Order example	ETT-C	032	S1	CS	N	C	

1	Type	ETT-C Electric Tubular Motor - Coil only
2	Size	<p>025 ISO 6432 - Bore 25 mm</p> <p>032 ISO 6432 - Bore 32 mm</p> <p>050 ISO 6432 - Bore 50 mm</p> <p>080 ISO 6432 - Bore 80mm</p>
3	Winding	<p>S1 Serial, Stack Length 1</p> <p>S2 Serial, Stack Length 2</p> <p>S3 Serial, Stack Length 3</p> <p>S4 Serial, Stack Length 4</p> <p>S5 Serial, Stack Length 5</p>
4	Connection and Feedback Type	<p>CS Intercontec Connector (Springtec EEDA101NN00000002000) - Feedback Analogue SinCos 1 Vpp -</p> <p>CI Intercontec Connector (Springtec EEDA101NN00000002000) - Feedback Incremental TTL</p> <p>CB Intercontec Connector (Springtec EEDA101NN00000002000) - Feedback BISS-C</p> <p>1S Flying leads, Length 1 m, rear output - Feedback Analogue SinCos 1 Vpp - Only ETT025</p> <p>2S Flying leads, Length 2.5 m, rear output - Feedback Analogue SinCos 1 Vpp - Only ETT025</p> <p>5S Flying leads, Length 5 m, rear output - Feedback Analogue SinCos 1 Vpp - Only ETT025</p>
5	Fixed Field	N Fixed Field
6	Protection Class	C IP67
7	Customized Options	Blank for standard motors

ETT Motor and Signal Cable

	1	2	3	4	5	6	7
Order example	ETT-CAP	X	003	PM	-	Y1	SL - 00

1	Cable Type	
	ETT-CAP	Power cable for ETT
	ETT-CAS	Signal cable for ETT
2	Fixed Field	
	X	Fixed field
3	Cable Length	
	001	1 m
	003	3 m
	005	5 m
	007	7 m
	010	10 m
	015	15 m
	020	20 m
4	Application Type	
	PM	High flex cable
5	Connector	
	Y1	Intercontec Y-TECH Connector
	I1	Intercontec M23 Connector
	X	Special Execution
6	Drive Type	
	SL	SLVD-N Drive
	C3	Compax3
	63	638 Drive
	IP	IPA Drive
7	Option	
	00	No special option
		Special customer drawing

Parker's Motion & Control Technologies

At Parker, we're guided by a relentless drive to help our customers become more productive and achieve higher levels of profitability by engineering the best systems for their requirements. It means looking at customer applications from many angles to find new ways to create value. Whatever the motion and control technology need, Parker has the experience, breadth of product and global reach to consistently deliver. No company knows more about motion and control technology than Parker. For further info call 00800 27 27 5374

Aerospace

Key Markets

Aftermarket services
Commercial transports
Engines
General & business aviation
Helicopters
Launch vehicles
Military aircraft
Missiles
Power generation
Regional transports
Unmanned aerial vehicles

Key Products

Control systems & actuation products
Engine systems & components
Fluid conveyance systems & components
Fluid metering, delivery & atomization devices
Fuel systems & components
Fuel tank inerting systems
Hydraulic systems & components
Thermal management
Wheels & brakes

Climate Control

Key Markets

Agriculture
Air conditioning
Construction Machinery
Food & beverage
Industrial machinery
Life sciences
Oil & gas
Precision cooling
Process
Refrigeration
Transportation

Key Products

Accumulators
Advanced actuators
CO₂ controls
Electronic controllers
Filter driers
Hand shut-off valves
Heat exchangers
Hose & fittings
Pressure regulating valves
Refrigerant distributors
Safety relief valves
Smart pumps
Solenoid valves
Thermostatic expansion valves

Electromechanical

Key Markets

Aerospace
Factory automation
Life science & medical
Machine tools
Packaging machinery
Paper machinery
Plastics machinery & converting
Primary metals
Semiconductor & electronics
Textile
Wire & cable

Key Products

AC/DC drives & systems
Electric actuators, gantry robots & slides
Electrohydraulic actuation systems
Electromechanical actuation systems
Human machine interface
Linear motors
Stepper motors, servo motors, drives & controls
Structural extrusions

Filtration

Key Markets

Aerospace
Food & beverage
Industrial plant & equipment
Life sciences
Marine
Mobile equipment
Oil & gas
Power generation & renewable energy
Process
Transportation
Water Purification

Key Products

Analytical gas generators
Compressed air filters & dryers
Engine air, coolant, fuel & oil filtration systems
Fluid condition monitoring systems
Hydraulic & lubrication filters
Hydrogen, nitrogen & zero air generators
Instrumentation filters
Membrane & fiber filters
Microfiltration
Sterile air filtration
Water desalination & purification filters & systems

Fluid & Gas Handling

Key Markets

Aerial lift
Agriculture
Bulk chemical handling
Construction machinery
Food & beverage
Fuel & gas delivery
Industrial machinery
Life sciences
Marine
Mining
Mobile
Oil & gas
Renewable energy
Transportation

Key Products

Check valves
Connectors for low pressure fluid conveyance
Deep sea umbilicals
Diagnostic equipment
Hose couplings
Industrial hose
Mooring systems & power cables
PTFE hose & tubing
Quick couplings
Rubber & thermoplastic hose
Tube fittings & adapters
Tubing & plastic fittings

Hydraulics

Key Markets

Aerial lift
Agriculture
Alternative energy
Construction machinery
Forestry
Industrial machinery
Machine tools
Marine
Material handling
Mining
Oil & gas
Power generation
Refuse vehicles
Renewable energy
Truck hydraulics
Turf equipment

Key Products

Accumulators
Cartridge valves
Electrohydraulic actuators
Human machine interfaces
Hybrid drives
Hydraulic cylinders
Hydraulic motors & pumps
Hydraulic systems
Hydraulic valves & controls
Hydrostatic steering
Integrated hydraulic circuits
Power take-offs
Power units
Rotary actuators
Sensors

Pneumatics

Key Markets

Aerospace
Conveyor & material handling
Factory automation
Life science & medical
Machine tools
Packaging machinery
Transportation & automotive

Key Products

Air preparation
Brass fittings & valves
Manifolds
Pneumatic accessories
Pneumatic actuators & grippers
Pneumatic valves & controls
Quick disconnects
Rotary actuators
Rubber & thermoplastic hose & couplings
Structural extrusions
Thermoplastic tubing & fittings
Vacuum generators, cups & sensors

Process Control

Key Markets

Alternative fuels
Biopharmaceuticals
Chemical & refining
Food & beverage
Marine & shipbuilding
Medical & dental
Microelectronics
Nuclear Power
Offshore oil exploration
Oil & gas
Pharmaceuticals
Power generation
Pulp & paper
Steel
Water/wastewater

Key Products

Analytical Instruments
Analytical sample conditioning products & systems
Chemical injection fittings & valves
Fluoropolymer chemical delivery fittings, valves & pumps
High purity gas delivery fittings, valves, regulators & digital flow controllers
Industrial mass flow meters/ controllers
Permanent no-weld tube fittings
Precision industrial regulators & flow controllers
Process control double block & bleeds
Process control fittings, valves, regulators & manifold valves

Sealing & Shielding

Key Markets

Aerospace
Chemical processing
Consumer
Fluid power
General industrial
Information technology
Life sciences
Microelectronics
Military
Oil & gas
Power generation
Renewable energy
Telecommunications
Transportation

Key Products

Dynamic seals
Elastomeric o-rings
Electro-medical instrument design & assembly
EMI shielding
Extruded & precision-cut, fabricated elastomeric seals
High temperature metal seals
Homogeneous & inserted elastomeric shapes
Medical device fabrication & assembly
Metal & plastic retained composite seals
Shielded optical windows
Silicone tubing & extrusions
Thermal management
Vibration dampening
